

Industry Liaison Subcommittee

Function

Committee members will provide proactive and reactive comments about the goals of, and reports from, each Subcommittee. Towards this end, members will:

- seek constructive input about the DEWS goals and draft reports from appropriate individuals in their companies
- forward their critiques to David Sullivan, for distribution to specific Subcommittees for their consideration

In this way the DEWS process will be able to benefit from the collective experience and knowledge of industry, which, in turn, should help in promoting a consensus in the definition, diagnosis and classification of dry eye syndromes.

Interaction with the Steering Committee

David Sullivan has offered to serve as the facilitator of this process, to communicate with the Industry Liaison Committee members, and to obtain draft reports from, and send industry critiques to, the various Subcommittees.

Involvement with the post-ARVO DEWS membership meeting

All Industry Liaison Committee members will be invited to the post-ARVO DEWS meeting, and will serve as active participants in the open sessions.
